Protecting the natural environment in your area

Investment in Musselburgh – March 26

Welcome to our newsletter updating you on Scottish Water's work at Esk Wastewater Pumping Station (WwPS).

Overview – Esk WwPS needed a full refurbishment after it experienced pump failure which required temporary pumps to be installed to maintain essential services.

Our surveys of the building and ancillary equipment identified complex and extensive work was required to restore the asset and infrastructure. The majority of this work was completed before Christmas. Our teams on site are now focusing on essential electrical works within the building, as well as reinstating the land we have occupied. **We expect a small presence to be on site until June 26, to conclude any outstanding work.**

Progress Update – since October 25, the station has been operating with the new pumps and ancillary equipment. We also completed the necessary roughcasting and roof repairs to the building.

Electrical work within the station is ongoing, as well as the commissioning of the new assets.

The site teams latest focus was to re-establish the original walkway around the station in preparation for the planned work to reseed the grass.

Next steps – we consulted a landscaping contractor who have advised us that the best time re-seed the grass is April, this will begin next month.

We have experienced some unforeseen delays with the planning requirements for the new security fencing. We hope to have this soon with the expectation that the fencing can be installed, then building painted, over the course of May and June. There will be a small section of the building omitted from the new fencing as this is owned by Scottish Power.

While our work is ongoing, **there will be no impact to residents' water or wastewater services.**

Area prepared for seeding.

We will also ask our landscaper to do some seeding work to the areas near the carpark at the top of Mountjoy Terrace.

We would like to thank the community for your continued cooperation and support while this essential work progresses.

Health & Safety – Keeping Children Safe. While extensive work has been carried out to make the site safe and secure, children can be drawn to construction sites.

We would like to encourage parent/guardians to help us keep them safe by warning them of the importance of **staying away and keeping out.**

These areas are not a safe place to play and there are real dangers within our working areas.

Making contact - If you want to contact Scottish Water in relation to the project, you can;
